IN RE: LPC #17980101 - Tazewell County
Pekin/Municipal #1

RECEIVED

AUG 22 1983

ILLINOIS DEPT. OF
STATE OF ILLINOIS

Gentlemen:

We have been advised by Randolph & Associates, Inc., Engineers for the City of Pekin, that the repair of erosion, erosion control, and draining of a low-lying area at the old City of Pekin Municipal Landfill #1 was completed on August 5, 1983, with the exception of seeding of disturbed area. It is our understanding that all work was completed to satisfy the requirements of the Illinois Environmental Protection Agency as stated in its letter of May 24, 1983. Seeding of disturbed areas cannot be completed until the weather moderates as seed will not presently germinate. It is planned to have the seeding completed in the early fall so that vegetation will be established before winter.

We call to your attention that one low area that ponds water on the south end of the dump site was not filled as it does not appear to be within the boundaries of the formerly leased property. The ability of the City of Pekin to complete the seeding above referenced will be subject to obtaining Mr. Rosenberg's approval to enter on the premises for that purpose.

We assume that you will be making your final inspection at an early date.

Very truly yours,

Ronald L. Keyser
Assistant Corporation Counsel
